# BLR's TrainingToday learning management system is an intelligent, intuitive, scalable platform that will take your training program to a world-class level.

☑ Manage all your staff training from one secure, centralized environment, leveraging HCPro's high-quality web-based courses to ensure **consistent**, **compliant messaging** across locations and departments.

☑ Learners will gain **anytime**, **anywhere**, **any-device access** to hand-picked courses, and managers can track their completion and success so everyone is on the same page.

☑ The system is packed with features proven to **maximize engagement**—like quizzes, gamification, and leaderboards—so learners stay motivated and you see **measurable performance improvement**, which will be reflected in your clinical and financial metrics.

☑ You also benefit from packaged integrations with critical software applications and information systems to **streamline processes** and increase user adoption.

Features of our new LMS:

- **Learning Paths** allow admins to customize the learning experience by create sequences of classes which must be taken in a specific order.
- **Assignment Scheduling** enables admins to plan assignments and dispense them automatically.
- **Gamification** motivates users by tracking points, achievements, and badges.
- **Continuing Education and Certificates** allow learners to receive confirmation and validation of course completion.
- **Industry Compliance** standards ensure that delivery is consistent with requirements specific to highly-regulated industries like manufacturing, government, healthcare, and law enforcement.
- **Course Marketplace (Coming Soon!)** enables users to purchase and consume courses via an online marketplace.
- **White Labeling Capabilities** allow clients to customize their account with homepage branding, personalized URL, and more.
- **Multilingual Features** provide multiple language choices for users for better accessibility.
- **Assessments and Practice** capabilities provide Quizzes, Testing and Software Simulations to reinforce and measure effectiveness of materials.
- **Content Delivery and Tracking** includes Self-led, Instructor-led, web-based collaboration and tracking of completion for compliance purposes.
- **Manager Portals** allows Managers and/or parent accounts to see progress of team members.
