

EHS HERO'S INDUSTRIAL HYGIENE TOOL

Our Industrial Hygiene module encompasses lab analysis and sampling, chain-of-custody documentation, equipment management, and action management all in one unified, integrated solution. Rather than wasting time looking through files to find sampling data, our tool allows you to search and find results within seconds so you can perform rapid analysis and make informed decisions.

With our Industrial Hygiene tool, you can:

- Access premade forms for personal, area, and equipment monitoring.
- Quickly and easily store, retrieve, and report on any sampling data.
- Automatically create chain-of-custody documentation.
- Calculate the duration of any sampling being done.
- Track instrument history and calibration.
- Create action plans with a single click.
- Avoid OSHA penalties regarding total maximum daily load (TMDL) or permissible exposure limit (PEL) violations.

Manage your industrial hygiene sampling requirements, reduce risk, and stay compliant with EHS Hero's new Industrial Hygiene tool.
